

## **Kura Oncology Announces Three Abstracts Accepted for Presentation at ASCO20 Virtual Scientific Program**

May 13, 2020

**– Oral presentation to highlight clinical data for tipifarnib in HRAS mutant solid tumors, including overall survival data in head and neck squamous cell carcinoma –**

SAN DIEGO, May 13, 2020 (GLOBE NEWSWIRE) -- Kura Oncology, Inc. (Nasdaq: KURA), a clinical-stage biopharmaceutical company committed to realizing the promise of precision medicines for the treatment of cancer, today announced that three abstracts highlighting its drug candidate tipifarnib have been accepted for presentation at the upcoming American Society of Clinical Oncology (ASCO) Virtual Scientific Program, to be held May 29-31, 2020.

"We are pleased to announce the presentation of three clinical abstracts for tipifarnib, including an oral presentation highlighting single-agent activity in multiple solid tumors with HRAS mutations," said Troy Wilson, Ph.D., J.D., President and Chief Executive Officer of Kura Oncology. "In addition, the oral presentation will feature compelling overall survival data from our RUN-HN Phase 2 trial in head and neck squamous cell carcinoma (HNSCC) patients with high HRAS mutant variant allele frequency, and we look forward to sharing those data at ASCO later this month."

The three abstracts are listed below and are now available on the ASCO meeting website at <http://www.abstract.asco.org>.

### **Preliminary activity of tipifarnib in tumors of the head and neck, salivary gland and urothelial tract with HRAS mutations**

Oral Abstract Session: Head and Neck Cancer

Abstract: 6504

### **The AIM-HN and SEQ-HN Study: A Pivotal Study Evaluating the Efficacy of Tipifarnib in Patients with Head and Neck Squamous Cell Carcinoma (HNSCC) with HRAS Mutations (AIM-HN) and the Impact of HRAS Mutations on Response to First Line Systemic Therapies for HNSCC (SEQ-HN)**

Poster Session: Head and Neck Cancer

Abstract / Poster: TPS6593 / 254

### **Tipifarnib, a farnesyltransferase inhibitor, for metastatic urothelial carcinoma harboring HRAS mutations**

Poster Session: Genitourinary Cancer—Kidney and Bladder

Abstract / Poster: 5086 / 155

Copies of the presentations will be available on Kura's website at [www.kuraoncology.com/pipeline/publications/](http://www.kuraoncology.com/pipeline/publications/) following presentation at the meeting.

### **About Tipifarnib**

Tipifarnib, is a potent, selective and orally bioavailable inhibitor of farnesyl transferase in-licensed from Janssen in December 2014. Previously, tipifarnib was studied in more than 5,000 cancer patients and showed compelling and durable anti-cancer activity in certain patient subsets; however, no molecular mechanism of action had been determined that could explain its clinical activity across a range of solid tumor and hematologic indications. Leveraging advances in next generation sequencing as well as emerging information about cancer genetics and tumor biology, the Company is seeking to identify those patients most likely to benefit from tipifarnib. Tipifarnib has been granted Fast Track designation by the U.S. Food and Drug Administration for the treatment of patients with HRAS mutant HNSCC. Kura has received multiple issued patents for tipifarnib, providing patent exclusivity in the U.S. and foreign countries.

### **About Kura Oncology**

Kura Oncology is a clinical-stage biopharmaceutical company committed to realizing the promise of precision medicines for the treatment of cancer. The Company's pipeline consists of two wholly owned small molecule drug candidates that target cancer signaling pathways where there is a strong scientific and clinical rationale to improve outcomes by identifying those patients most likely to benefit from treatment. Kura's most advanced drug candidate is tipifarnib, a potent, selective and orally bioavailable farnesyl transferase inhibitor currently in a registration-directed trial in patients with recurrent or metastatic HRAS mutant HNSCC. The Company's pipeline is also highlighted by KO-539, a potent and selective inhibitor of the menin-KMT2A(MLL) protein-protein interaction currently in a Phase 1/2A clinical trial in patients with relapsed/refractory acute myeloid leukemia. For additional information about Kura, please visit the Company's website at [www.kuraoncology.com](http://www.kuraoncology.com).

### **Forward-Looking Statements**

*This news release contains certain forward-looking statements that involve risks and uncertainties that could cause actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Such forward-looking statements include statements regarding, among other things, the efficacy, safety and therapeutic potential of Kura's product candidate tipifarnib. Factors that may cause actual results to differ materially include the risk that compounds that appeared promising in early research or clinical trials do not demonstrate safety and/or efficacy in later preclinical studies or clinical trials, the risk that Kura Oncology may not obtain approval to market its product candidates, uncertainties associated with performing clinical trials, regulatory filings and applications, risks associated with reliance on third parties to successfully conduct clinical trials, the risks associated with reliance on outside financing to meet capital requirements, and other risks associated with the process of discovering, developing and commercializing drugs that are safe and effective for use as human therapeutics, and in the endeavor of building a*

*business around such drugs. You are urged to consider statements that include the words “may,” “will,” “would,” “could,” “should,” “believes,” “estimates,” “projects,” “promise,” “potential,” “expects,” “plans,” “anticipated,” “intends,” “continues,” “designed,” “goal,” or the negative of those words or other comparable words to be uncertain and forward-looking. For a further list and description of the risks and uncertainties the company faces, please refer to the company’s periodic and other filings with the Securities and Exchange Commission, which are available at [www.sec.gov](http://www.sec.gov). Such forward-looking statements are current only as of the date they are made, and Kura Oncology assumes no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.*
