

Kura Oncology to Participate in Three Upcoming Investor Conferences

October 30, 2023

SAN DIEGO, Oct. 30, 2023 (GLOBE NEWSWIRE) -- Kura Oncology, Inc. (Nasdaq: KURA), a clinical-stage biopharmaceutical company committed to realizing the promise of precision medicines for the treatment of cancer, today announced that Troy Wilson, Ph.D., J.D., President and Chief Executive Officer, is scheduled to participate in three upcoming investor conferences.

- A virtual fireside chat at the TD Cowen Fall Oncology Innovation Summit: Insights for SITC and ASH event at 12:00 p.m. ET / 9:00 a.m. PT on November 3, 2023;
- A fireside chat at the Stifel 2023 Healthcare Conference in New York at 11:30 a.m. ET / 8:30 a.m. PT on November 14, 2023; and
- A fireside chat at the Jefferies London Healthcare Conference in London at 9:30 a.m. GMT / 5:30 a.m. ET / 2:30 a.m. PT on November 16, 2023.

Live audio webcasts will be available in the Investors section of Kura's website at www.kuraoncology.com, with archived replays available following all three events.

About Kura Oncology

Kura Oncology is a clinical-stage biopharmaceutical company committed to realizing the promise of precision medicines for the treatment of cancer. The Company's pipeline consists of small molecule drug candidates that target cancer signaling pathways. Ziftomenib is a once-daily, oral drug candidate targeting the menin-KMT2A protein-protein interaction for the treatment of genetically defined acute myeloid leukemia (AML) patients with high unmet need. Kura is currently enrolling patients in a Phase 2 registration-directed trial of ziftomenib in NPM1-mutant relapsed or refractory AML (KOMET-001). The Company is also conducting a series of studies to evaluate ziftomenib in combination with current standards of care, beginning with venetoclax/azacitidine and standard induction cytarabine/daunorubicin chemotherapy in NPM1-mutant and KMT2A-rearranged newly diagnosed and relapsed/refractory AML (KOMET-007). Tipifarnib, a potent and selective FTI, is currently in a Phase 1/2 trial in combination with alpelisib for patients with PIK3CA-dependent head and neck squamous cell carcinoma (KURRENT-HN). Kura is also evaluating KO-2806, a next-generation FTI, in a Phase 1 dose-escalation trial as a monotherapy and in combination with other targeted therapies (FIT-001). For additional information, please visit Kura's website at www.kuraoncology.com and follow us on [Twitter](#) and [LinkedIn](#).
