

Kura Oncology to Participate in Bank of America Securities Healthcare Conference

May 6, 2025

SAN DIEGO, May 06, 2025 (GLOBE NEWSWIRE) -- Kura Oncology, Inc. (NASDAQ: KURA), a clinical-stage biopharmaceutical company committed to realizing the promise of precision medicines for the treatment of cancer, today announced its participation in Bank of America Securities 2025 Healthcare Conference. Troy Wilson, Ph.D., J.D., President and Chief Executive Officer, is scheduled to participate in a fireside chat at 6:00 p.m. ET / 3:00 p.m. PT on May 13, 2025. A live audio webcast of the fireside chat will be available in the Investors section of Kura's website at www.kuraoncology.com, with an archived replay following the event.

About Kura Oncology

Kura Oncology is a clinical-stage biopharmaceutical company committed to realizing the promise of precision medicines for the treatment of cancer. The Company's pipeline consists of small molecule drug candidates designed to target cancer signaling pathways. Ziftomenib, a once-daily, oral menin inhibitor, is the first and only investigational therapy to receive Breakthrough Therapy Designation from the U.S. Food and Drug Administration for the treatment of relapsed/refractory ("R/R") *NPM1*-mutant acute myeloid leukemia ("AML"). In November 2024, Kura Oncology entered into a global strategic collaboration agreement with Kyowa Kirin Co., Ltd. to develop and commercialize ziftomenib for AML and other hematologic malignancies. Enrollment in a Phase 2 registration-directed trial of ziftomenib in R/R *NPM1*-mutant AML has been completed, and in the second quarter of 2025, the companies announced submission of a New Drug Application for ziftomenib for the treatment of adult patients with R/R *NPM1*-mutant AML. Kura Oncology and Kyowa Kirin are also conducting a series of clinical trials to evaluate ziftomenib in combination with current standards of care in newly diagnosed and R/R *NPM1*-mutant and *KMT2A*-rearranged AML. KO-2806, a next-generation farnesyl transferase inhibitor, is being evaluated in a Phase 1 dose-escalation trial as a monotherapy and in combination with targeted therapies for patients with various solid tumors. Tipifarnib, a potent and selective farnesyl transferase inhibitor, is currently in a Phase 1/2 trial in combination with alpelisib for patients with *PIK3CA*-dependent head and neck squamous cell carcinoma.
