

## Kura Oncology Receives \$30 Million Development Milestone Payment in Ziftomenib AML Program with Kyowa Kirin

October 24, 2025

*- Milestone triggered by dosing of first patient in frontline AML Phase 3 clinical program-*

SAN DIEGO, Oct. 24, 2025 (GLOBE NEWSWIRE) -- Kura Oncology, Inc. (Nasdaq: KURA), a clinical-stage biopharmaceutical company committed to realizing the promise of precision medicines for the treatment of cancer, today announced receipt of a \$30 million milestone payment under its collaboration agreement with Kyowa Kirin in connection with the dosing of the first patient in the KOMET-017 Phase 3 registrational trials of ziftomenib, a once-daily, investigational oral menin inhibitor. Kura and Kyowa Kirin announced the launch of the KOMET-017 trials on September 29, 2025.

KOMET-017 ([NCT07007312](#)) comprises two independent, global, randomized double-blind, placebo-controlled Phase 3 trials to evaluate ziftomenib in combination with both intensive and non-intensive chemotherapy regimens in patients with newly diagnosed *NPM1*-mutated (*NPM1*-m) or *KMT2A*-rearranged (*KMT2A*-r) acute myeloid leukemia (AML). Kura believes KOMET-017 is the only menin inhibitor program actively pursuing registrational trials across both intensive and non-intensive chemotherapy settings.

### About Kura Oncology

Kura Oncology is a clinical-stage biopharmaceutical company committed to realizing the promise of precision medicines for the treatment of cancer. Kura's pipeline of small molecule drug candidates is designed to target cancer signaling pathways and address high-need hematologic malignancies and solid tumors. Kura is developing ziftomenib, a menin inhibitor targeting certain genetic drivers of acute myeloid leukemias and continues to pioneer advancements in menin inhibition for acute leukemias and solid tumors and in farnesyl transferase inhibition to address mechanisms of adaptive and innate resistance in the treatment of solid tumors. ### Forward-Looking Statements

This news release contains certain forward-looking statements that involve risks and uncertainties that could cause actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Such forward-looking statements include, among other things, statements regarding the therapeutic potential of ziftomenib and the KOMET-017 trial being the only menin inhibitor program actively pursuing registrational trials across both intensive and non-intensive chemotherapy settings. Factors that may cause actual results to differ materially include the risk that compounds that appeared promising in early research or clinical trials do not demonstrate safety and/or efficacy in later preclinical studies or clinical trials, the risk that Kura may not obtain approval to market its product candidates, uncertainties associated with performing clinical trials, regulatory filings, and other interactions with regulatory bodies, the risk that the collaboration with Kyowa Kirin is unsuccessful, and other risks associated with the process of discovering, developing and commercializing drugs that are safe and effective for use as human therapeutics, and in the endeavor of building a business around such drugs. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "promise," "potential," "expects," "plans," "anticipates," "intends," "continues," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. For a further list and description of the risks and uncertainties Kura faces, please refer to Kura's periodic and other filings with the Securities and Exchange Commission, which are available at [www.sec.gov](http://www.sec.gov). Such forward-looking statements are current only as of the date they are made, and Kura assumes no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.
